Front-End Developer

Hello, I'm Engin. I am in love with technology and design. That's why I chose the front-end developer career. As someone who is open to innovations, I like to use different technologies. I have a harmonious, ambitious, and creative personality who cooperates well with others and can keep up with the pace.

Specialties: HTML5, CSS3, JavaScript, UI/UX, Vue.js

Technologies: Bootstrap, DevExpress

Languages: English: B1

Achievements: I won the first place in speed reading in primary school, the best team player in basketball in high school, the most compatible intern in high school internship.

Volunteer Experiences: Organizer in BİLMÖK Organization Leader, sponsorship and social media coordinator in The global game jam event, İnönüGüncel (University page) Content editor, basketball team player in Bursa jade club.

PROFESSIONAL EXPERIENCE

İletişim Yazılım, Bursa

June- September 2022

Intern

Web design and interface on the front end. I converted the design into code using technologies such as HTML, CSS, JavaScript and Bootstrap. I took part in the project management of the hospital project using DevExpress.

EDUCATION AND COURSES

Inonu University Computer Engineering (Bachelor's Degree)

2018 - 2022

Protein Vue.js Bootcamp([Link](#))

September- November 2022

Toptalent.co English Level - CEFR B2 ([Link](#))

Indefinite

PROJECTS

Horse Racing Game ([Code](#)) - ([Live](#))

2022

Technologies: HTML – JS – CSS – Vue.js - Figma

Features: Real-time race of horses running in 8 different lanes on a straight route.

Giphy Search Api ([Code](#)) - ([Live](#))

2022

Technologies: Vue.js - Axios

Features: I pulled the data from GIPHY.com with Axios api. Then, I published it on Firebase.

Inonu University Online Balance Loading System ([Code](#))

2022

Technologies: Bootstrap - Apache - PHP - MySQL – HTML – JS – CSS – PHPStorm

Features: This project is my university cafeteria system. Here we can load money to our cafeteria card and view it. I created the interface of this site
